MARK SOLIMO

Superintendent

June 22, 2011

Dear Parents/Guardians,

Over the summer months, on or about June 24, 2011, the Robert L. Craig School will be undergoing renovation improvements which include the removal of the existing boilers and the installation of new efficient boilers. Since the boilers were installed with the original building, there is asbestos insulation present. We have hired a qualified licensed asbestos abatement company and Whitman Environmental to monitor the demolition operations to assure that all safety procedures and disposal measures are followed. The work will be self-contained in the boiler room only which will be sealed off to the rest of the school. In addition to the work being supervised, we will be taking air samples to verify and confirm that no air-borne asbestos particles are present once the demolition and removals are complete.

Please contact our office if there are any questions.

Sincerely,

Mark Solimo
Superintendent
